

SecureVideo EHR Partner Program

About Our Partnership Program

SecureVideo's Partnership Program gives various types of healthcare and "healthcare-adjacent" businesses and organizations the opportunity to benefit from a more structured partnership with us. Each type of partnership has its own process and associated benefits, and our team will work with you to determine the best fit based on your unique situation!

EHR Partners

A potential EHR Partner would already have an established clientele for whom they're providing other digital services, and would like to offer our quality telehealth solution as part of their product suite. As an EHR Partner, you may choose to offer SecureVideo as a stand-alone product to your current customer base, or offer it as a white-labeled product under their own brand. This relationship will be mutually beneficial as we will provide a service to your customer base that you do not have in your existing product suite.

Partnership Benefits

- ▶ Access to feature-rich, reliable telehealth platform, with partner administrative control of your customers' accounts
- ▶ Ability to sell SecureVideo telehealth solution
- ▶ Pricing incentives
- ▶ Dedicated partner relationship manager
- ▶ 24/7 technical support for you & your customers (and their telehealth participants!)
- ▶ Website and content highlight
- ▶ Comprehensive training, resources and education

Become an EHR Partner in 4 Easy Steps

- 1 Notify SecureVideo of interest in becoming an EHR Partner
- 2 Participate in initial discovery call with a SecureVideo team member
- 3 Complete a partner agreement
- 4 Engage in an onboarding session

Introduce SecureVideo to Your Network – Become an EHR Partner Today
