

WAYS SECUREVIDEO TELEHEALTH PROVIDES DATA SECURITY

Safeguarding patient data is non-negotiable in healthcare. SecureVideo's suite of protective features offers unparalleled security infrastructure that ensures total compliance with industry standards that protect patient privacy. As a HITRUST certified telehealth software platform, SecureVideo leverages robust security frameworks to protect PHI and bolster patient confidence.

SECURITY FEATURES

HIPAA COMPLIANT DATA CENTER

Ensures a safeguarded fortress for patient data in HIPAA-compliant telehealth.

INTRUSION PREVENTION & DETECTION MEASURES

SecureVideo has a robust Intrusion Prevention System (IPS) and Intrusion Detection System (IDS) to examine network traffic for signs of unauthorized access or unsanctioned activities.

COMPREHENSIVE SYSTEM AUDITING

The platform conducts exhaustive audits, tracking the full spectrum of activities within the network.

MULTI-FACTOR AUTHENTICATION

Multi-Factor Authentication (MFA) adds an extra layer of protection for users logging in, helping to ensure only authorized users have access to the system and patient data.

SecureVideo: HITRUST Certified & HIPAA Compliant

SecureVideo's HITRUST Certification demonstrates our unwavering commitment to security and compliance with rigorous federal and state regulations, ensuring the highest standards of data protection for our telehealth platform.
