

TOP 6 TELEHEALTH FEATURES FOR DENTISTS

Teledentistry has transformed oral care, making virtual consultations more accessible and efficient. With advancements in technology, dentists can now provide seamless remote care to patients. This infographic highlights the 6 telehealth features for dentists offered by SecureVideo, designed to enhance practice management, patient experience, and overall efficiency.

ACCOUNT CUSTOMIZATION

SecureVideo lets dentists personalize their telehealth platform with a custom logo, E-Documents, session invites, subdomain, and support contact.

1

ADVANCED SCHEDULING & NOTIFICATIONS

Patients can book appointments easily, while automated paperwork assignment and reminders reduce admin workload.

2

ADVANCED SESSION TOOLS

Customize your virtual clinic with E-Documents, clinical chat, and other tailored session features.

3

LIVE INTERPRETATION SERVICE

Connect with a live interpreter on demand to ensure language isn't a barrier to care.

4

MASKED CALLING

Patients can book appointments easily, while automated paperwork assignment and reminders reduce admin workload.

5

VIRTUAL WAITING ROOM

Patients can complete paperwork, make payments, and access resources while waiting for their session.

6
